¹ Main source: Jürgen Hofrichter: Weight variables in Eurobarometer surveys: an overview. ZEUS. April 1991.

² Starting with EB19 the U.K. population size weight (NATION WEIGHT I) also includes the available post-stratification weighting factors (NATION WEIGHT II) for other countries.

³ Starting with EB7 the EUROPEAN WEIGHT includes the available post-stratification weighting factors.

⁴ French rural cases have been duplicated. Duplicate case indicators are not always available.

⁵ Dutch cases have been duplicated. Duplication scheme not documented and case indicator not always available.

⁶ National post-stratification weighting factors were re-constructed by ICPSR (see study documentation).

⁷ Eurobarometer 17 includes a youth oversample. Sample specific weighting factors are available for all countries.

⁸ The UK weighting factor is included in the post-stratification weight (NATION WEIGHT II).

⁹ Youth sample. Weights are not documented.
